Jesse brodkin
@jesse_brodkin

It looks like my perfectly reasonable letter regarding an opaque investigation of the \$sava manipulated images by JoN didn't make the latest issue. I trust electronic publication can proceed without further delay 🙌 The scientific community deserves transparency @MarinaP63

Jesse brodkin @jesse_brodkin · Dec 16, 2021

Replying to @MarinaP63

@MarinaP63 I think this is a fair letter regarding your published erratum in JoN and deserves publication and an editors response before January (as "a few days" suggests).

Thank you for your eLetter response to Journal of Neuroscience

Thank you for your submission. Below is a copy of your eLetter as we received it. Your eLetter, if accepted, should be viewable within a few days.

Sincerely,
The Editorial staff of Journal of Neuroscience

Article (citation):

"Erratum: Wang et al., "Reducing Amyloid-Related Alzheimer's Disease Pathogenesis by a Small Molecule Targeting Filamin A"" Journal of Neuroscience (2021): JN-ERR-2154-21. Web. 11 Dec. 2021.

<https://www.jneurosci.org/content/early/2021/11/10/JNEUROSCI.2154-21.2021>

The eLetter RE: Accompanying statement to this Erratum was submitted on 11 Dec 2021:

This erratum was accompanied by a statement authorized by The Journal of Neuroscience authorized made by Cassava Sciences, reprinted in full below: "The Journal of Neuroscience follows COPE [Committee on Publication Ethics] guidelines and takes any claims of misconduct very seriously. In response to allegations of data manipulation in JNeurosci 2012;32:9773-9784 the Journal requested raw data, including images of original, uncropped Western blots. The Journal determined that there was one duplicated panel in Figure 8 and a Corrigendum was requested and will be printed. No evidence of data manipulation was found for Western blot data." However, upon inspection of the blot images it is arguably apparent that image manipulation has occurred (see pubpeer.com/publications/C239004AE2A20648BA7193DE5275A81). Would the authors of the authorized statement from the Journal of Neuroscience please disclose who exactly authorized this statement, who was involved in coming to the conclusion of "no evidence of manipulation" and what methods, including who was involved in the application of those methods, were employed to come to this determination? Additionally, this erratum is not accompanied by any COI statement. Would the authors of the authorized statement also please disclose any conflicts of interest of the persons involved in the decision and authorization for publication of the conclusions? This request seems reasonable as findings, even negative ones, in this journal typically require named authors, detailed methods and COI statements.
